Course and Contact Information

Instructor: Auston Davis
Office Location: MacQuarrie Hall 217
Telephone: 408-832-5448
Email: auston.davis@sjsu.edu (preferred)
Office Hours: Wednesdays 2:30pm – 3:15pm (Zoom online only)
Class Days/Time: Mon/Wed 6:00 – 7:15pm
Classroom: Live Online
Prerequisites: CS149 or instructor consent

Course Format

This a hybrid classroom lecture type format. Students will be required to use a functional laptop with a working camera and audio to all live online sessions, quizzes, the midterm and final. Each week there will be Live Online Class and on occasion a Pre-Recorded lecture. It is the student’s responsibility to ensure their network connectivity, camera and audio are functional during live online class sessions. Students are highly encouraged to attend the Live Online class sessions.

Canvas

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on the Canvas Learning Management System course login website at http://sjsu.instructure.com. You are responsible for regularly checking with the messaging system through MySJSU at http://my.sjsu.edu (or other communication system as indicated by the instructor) to learn of any updates.

Zoom

I will be providing a Zoom link for each Live Online class at the beginning of the semester via Canvas. It is your responsibility to ensure your Zoom client is working and that you are able to attend class on time. While in class you are required to have your video camera on and your audio working. Again, please check Canvas often.

Course Description

This course focuses on security mechanisms for protecting information in computer systems and networks. This includes cryptography and its applications to security services in distributed systems, mathematics of
Cryptography, access control, protection models, security policies, design of secure systems, firewalls, and intrusion detection.

**Course Learning Outcomes**

Upon successful completion of this course, students will be knowledgeable of the major technical security challenges in each of the following four areas: cryptography, access control, protocols, and software. In addition, students will have advanced knowledge in cryptanalysis, endpoint defense and software reverse engineering, as evidenced by work on the major projects.

**Required Texts/Readings**

**Textbook**

- Available via Amazon.com or Wiley.com
- Make sure it is the Third Edition as several major updates are in the 3rd Edition

**Other Readings**

- *Software Reverse Engineering (SRE) website (http://reversingproject.info/)*. This website, which was created by a former masters student, includes lots of good information and detailed exercises with solutions.
- *Counter Hack Reloaded: A Step-by-Step Guide to Computer Attacks and Effective Defenses*, Ed Skoudis with Tom Liston, Prentice Hall, 2006, ISBN: 0-13-148104-5. There are many books that claim to provide information on how to foil hackers, but this is by far the best that I have seen. This is an updated version of the original Counter Hack, published in 2001.
San José State University  
School/Department  
Computer Science 265: Cryptography and Computer Security, Fall 2022

Course Requirements and Assignments

- **Lectures**: Students are strongly encouraged to attend all online live lectures. Any material presented in any lecture is testable information for the midterm and final exam. Quite a bit of material that is covered in class only will be necessary to successfully complete the projects, mid-term and final.

- **Homework**: There will be a total of 7 homework assignments due. Assignments are due no later than midnight the day they are due. **No late homework will be accepted for any reason**. Assigned problems require a solution and an explanation (or work) detailing how you arrived at your solution. Cite any outside sources used to solve a problem.

- **Projects**: Students are expected to complete two projects over the course of the semester. The Cryptology Project (Project #1) and Reverse Engineering Project (Project #2) information is provided in separate documents and posted to Canvas.

- **Midterm Exam**: The midterm exam will be held on Oct 13th. The midterm will be in-class, closed-book, and comprehensive. Makeup midterm exams will only be given in cases of a verifiable emergency and at the discretion of the professor.

- **Final Exam**: The final exam will be held on Dec 7\(^{th}\) from 5:15 PM – 7:30 PM. Makeup final exams will only be given in cases of a verifiable emergency and at the discretion of the professor.

Grading Information

In addition to the stipulations provided above, grading will be based on the following:

Assignments: 20%  
Projects: 30%  
Midterm: 20%  
Final: 30%

Grading Scale:

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>92 and above</td>
<td>A</td>
</tr>
<tr>
<td>90 - 91</td>
<td>A-</td>
</tr>
<tr>
<td>88 - 89</td>
<td>B+</td>
</tr>
<tr>
<td>82 - 87</td>
<td>B</td>
</tr>
<tr>
<td>80 - 81</td>
<td>B-</td>
</tr>
<tr>
<td>78 - 79</td>
<td>C+</td>
</tr>
</tbody>
</table>
Classroom Protocol

- No extra credit is anticipated
- Wireless laptop is required. You will be informed when it is needed for a particular activity
- **Cheating will not be tolerated!**
- Student must be respectful of the teacher and other students
- No disruptive or annoying talking
- Turn off cell phones
- Class begins on time
- Class is not over until I say it's over
- A valid picture ID is required at all times

University Policies

Per University Policy S17-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on Office of Graduate and Undergraduate Programs’ Syllabus Information web page at http://www.sjsu.edu/gup/syllabusinfo/”

Course Schedule

This schedule is subject to change with fair notice. Notifications will be made via Canvas
