

**San José State University
Science/Computer Science
CS176, Introduction to Social Network Analysis, Section 1, Spring, 2022**

Course and Contact Information

Instructor(s):	Aikaterini Potika
Office Location:	MacQuarrie Hall 215
Telephone:	408-9245134
Email:	katerina.potika@sjsu.edu
Office Hours:	Mondays-Wednesdays 9:30-10:15 am and Mondays 1:30-2 pm or by appointment
Class Days/Time:	Mondays-Wednesdays 12:00-1:15 pm
Classroom:	MH 225 (online until 2/14/2022)
Prerequisites:	CS 146 (with a grade of "C-" or better in each); or instructor consent.

Course Description

The Web and social networks are complex networks. We will study them by unifying tools from different disciplines: computer science, economics, and social sciences. Topics include graph theory, information networks, search, advertisement, auctions etc.

Course Format

Technology Intensive, Hybrid, and Online Courses

The course will be in person, and only online synchronous zoom meetings plus recording lectures until 2/14/2022, thus allowing students to listen to recorded lecturers asynchronously.

Course Learning Outcomes (CLO)

Upon successful completion of this course, students will be able to:

- CLO1. Discuss graph theory used to predict and determine network behavior
- CLO2. Reflect on the basic topics of behavior analysis
- CLO3. Carry out the basics of web search, sponsored and matching markets
- CLO4. Determine network properties and features in real world settings
- CLO5. Integrate different approaches from computer science, economics and social studies to design complex networks
- CLO6. Carry out network analysis using various software and visualizations
- CLO7. Summarize main tools to analyze complex networks

Required Texts/Readings

Textbook

Networks, Crowds, and Markets: Reasoning About a Highly Connected World, 1st Edition by [David Easley](#) (Author), [Jon Kleinberg](#) (Author)

ISBN-13: 978-0521195331

ISBN-10: 0521195330

Other Readings

- Social and Economic Networks, by Matthew O. Jackson, ISBN: 9780691148205
- Social Media Mining An Introduction by Reza Zafarani, Mohammad Ali Abbasi, Huan Liu, ISBN: 9781107018853
- Online resources

Other technology requirements / equipment / material

Course Requirements and Assignments

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.”

Homework assignments (3 total): individual, regularly assigned, include written problem assignments, and perhaps some online exercises. Solutions are not posted. The homework is a tool for you to learn the material and prepare for the exams.

Reading and Video assignments: Reading assignments and posted videos are regular and for the next class (see schedule).

Quizzes: regular quizzes are online (total 6 only 5 top count). Cover topics from the reading and video assignment and/or the homework.

Participation & Discussions: Contribution during zoom meetings, polls and activities, and in the discussion forum of Canvas.

Group Project: A programming project of your choice related to the course's topics in groups of two students and to cover CLO 6 and CLO 7. Never use any code you find on the web, unless given by me. Penalty for late submission 5% for every 3 days up to 9 days, after that no submission will be accepted. Final presentation at the end of the semester is mandatory.

Case study (1): Choose a dataset and perform analysis using R. Five minutes presentation in class and 1-2 page report.

Midterm exam: One Midterm exam during the semester.

Final Examination or Evaluation

One final, written, and cumulative exam, split in two parts. The exams contain multiple-choice questions, short answer questions and questions that require pseudocode and/or computations.

Grading Information

No extra point options (only the final exam offers extra points option). Final exam is comprehensive.

Grading Information

Determination of Grades

No make-ups exams except in case of verifiable emergency circumstances. *Penalty for late submission, 5% for every 3 days up to 9 days, after that no submission is accepted (without counting weekends).* Never email your assignments, always upload to Canvas. Rubrics and examples will be given.

Final Grade:

- 25% Project
- 15% Case study
- 10% Quizzes
- 10% Homework
- 10% Participation & Discussions
- 15% Midterm
- 15% Final

<i>Grade</i>	<i>Percentage</i>
A plus	96 to 100%
A	93 to 95%
A minus	90 to 92%
B plus	86 to 89 %
B	82 to 85%

B minus	78 to 82%
C plus	74 to 77%
C	70 to 73%
C minus	65 to 69%
D plus	62 to 64%
D	58 to 61%
D minus	55 to 57%
F	<54%

Classroom Protocol

During zoom meetings: camera on, mute yourself (unless you have a question or want to contribute), and dress appropriately. Private interactions with other students are prohibited unless you are in a breakroom. Please avoid disturbing the class: turn-off cell phones (or put them on vibrate mode), no text messaging in the class or the exams, no taking pictures and video, avoid coming late, no talking or whispering with other students during the instructor's presentation. You may not publicly share or upload material of this course such as exam questions, lecture notes, or solutions without my consent.

CoS COVID-19 Safety

All students registered for a College of Science (CoS) class with an in-person component must view the [CoS COVID-19 Training slides](#) and the [SJSU Phased Adapt Plan](#) website and acknowledge reading them according to their instructor's directions. By working together to follow these county and SJSU safety practices, we can keep our college safer. Students who do not follow COVID-19 Safety practice(s) outlined in the training, the SJSU Phased Adapt Plan, or instructions from their instructors, TAs or CoS Safety Staff may be dismissed from CoS buildings, facilities or field sites. Please review this training as needed throughout the semester, as updates will be implemented as changes occur (and posted to the same links).

University Policies

Per [University Policy S16-9](http://www.sjsu.edu/senate/docs/S16-9.pdf) (<http://www.sjsu.edu/senate/docs/S16-9.pdf>), relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on [Syllabus Information web page](http://www.sjsu.edu/gup/syllabusinfo) (<http://www.sjsu.edu/gup/syllabusinfo>), which is hosted by the Office of Undergraduate Education. Make sure to visit this page to review and be aware of these university policies and resources.

The instructor reserves the right to drop students that do not show up during the first two lectures.

CS 176 Section 1 / Introduction to Social Network Analysis, Spring 2022, Course Schedule

The schedule is subject to change with fair notice and announced on Canvas.

The schedule is subject to change with fair notice and how the notice will be made available

Lesson	Date	Topic	Reading/Projects (part of chapters covered)
1	1/26	Introduction	Chapters 1, 2
2	1/31	Graphs	Chapter 2
3	2/2	Graphs, Visualizations	Chapter 2
4	2/7(drop)	Centrality measures	Other resources
5	2/9	Centrality measures	Other resources
6	2/14(add)	Strong/Weak Ties	Ch 3
7	2/16	Graph Partitioning	Ch 4
8	2/21	Graph Partitioning	Ch 4
9	2/23	Graph and node embeddings	other
10	2/28	Graph classification, link prediction, higher order structures	other
11	3/2	Homophily/Segregation	Ch 4
12	3/7	Positive and Negative Relationships, Structural Balance	Ch 5
13	3/9	Positive and Negative Relationships, Structural Balance	Ch 5, case studies
14	3/14	Behavior Analysis, Game Theory	Ch 6, 8, case studies
15	3/16	Behavior Analysis, Game Theory	Ch 6, 8, case studies
16	3/21	Auctions and Markets	Ch 9, 10, case studies
	3/23	Midterm	
	3/28-4/1	Break	

17	4/4	Auctions and Markets	Ch 9, 10, case studies
18	4/6	Sponsored Search Markets	Ch 15
19	4/11	Sponsored Search Markets	Ch 15
20	4/13	Structure of the Web	Ch 13
21	4/18	Link Analysis, Web Search	Ch 14
22	4/20	Link Analysis, Web Search	Ch 14
23	4/25	Information Cascades	Ch 16
24	4/27	Rich get richer phenomena (power laws), diffusion in networks	Ch 18,20
25	5/2	Properties of graphs and random graphs	Ch 18,20
26	5/4	Epidemics	Ch 21
27	5/9	Voting	Ch 23
28	5/11	Project presentations	
29	5/16	Project presentations	
		Final exam Thursday, May 19 9:45 AM-12:00 PM
