Course and Contact Information

Instructor: Kathy Lam
Office Location: Online
Email: kathy.lam@sjsu.edu
Office Hours: T/R: 4:15pm-5:45pm or by appointment
Class Days/Time: T/R 3:00pm - 4:15pm
Classroom: Online from 01/26/22 – 02/11/22:
https://sjsu.zoom.us/j/89992307490?pwd=YUZrTWgrS1FtaTFTRW1ZNUNDywz2Zz09
Meeting ID: 899 9230 7490
Password: 971354
In person starting 02/14/22:
MacQuarrie Hall 222 (MH 222)

Prerequisites: This course is intended for students who have no prior programming experience. This course is not open to computer science majors or minors or software engineering majors.

Course Format

● Class lectures consist of "lecture" mode and "lab" mode (explained in Classroom Protocol)
● You are required to bring your wireless laptop to each class
● Exams will be online, during class time, and closed book
● Course materials such as syllabus, handouts, notes, hands-on exercise, project instructions, etc. can be found on Canvas Learning Management System course login website at https://sjsu.instructure.com. You are responsible for regularly checking with the Canvas messaging system to learn of any updates.

Course Description

This course is an introduction to Python Programming. Introduction to Python programming in interesting, relevant, and practical contexts. Programming skills are developed to solve problems in such fields as life sciences, mathematics, and business. Fundamental programming constructs: data structures and algorithms, iterations, and functions.

Prerequisite: This course is intended for students who have no prior programming experience. This course is not open to computer science majors or minors, or software engineering majors.

Note: This course is mainly for life science students interested in pursuing a Minor in Bioinformatics. In other words, we will cover Python with a bias towards examples drawn from Biology.
**Course Learning Outcomes (CLO)**

Upon successful completion of this course, students will be able to:

1. **CLO 1**: Explain fundamental programming constructs such as assignments, sequential operations, iterations, conditionals, defining functions, and abstraction.
2. **CLO 2**: Analyze and explain the behavior of Python programs.
3. **CLO 3**: Apply fundamental programming constructs in life and physical science contexts.

**Required Texts/Readings**

**Note:** The author is a biologist. This book, as well as Advanced Python for Biologists, were written especially for scientists who are new to programming. The author maintains a website for the books at [https://pythonforbiologists.com](https://pythonforbiologists.com). An older version of the book can be found online: [http://userpages.fu-berlin.de/digga/p4b.pdf](http://userpages.fu-berlin.de/digga/p4b.pdf).

**Note:** We will cover the first eight chapters of the book.

**Other Readings**

Additional course readings, examples, exercises, etc. will be assigned and will be provided by the instructor.

**Course Requirements and Assignments**

1. **Hands-On Exercises (20%)**: We will have a number of hands-on exercises. You will work on these exercises in class with your assigned groups. The purpose of the hands-on exercises is to develop your understanding of the material and your skills in problem-solving and in programming. Occasionally, you will be asked in class to go through your group solutions (programs) and share them with (explain them to) the rest of the class. Hands-on exercises will need to be submitted on Canvas, and the due dates will be announced in class.

2. **Homework (20%)**: Five homework assignments that reinforce lecture and practical skills will be assigned. The purpose of the assignments is to develop your understanding of the material and your skills in problem solving and in programming. Homework assignments will be submitted via Canvas for grading. Please note that you will be responsible for knowing/understanding the content in all homework questions. Assignments are due at the beginning of the lecture and must be submitted on Canvas by 2:59pm.

3. **Term-Project (20%)**: There will be a group programming project. Information on the project (group formations, topics, deadlines) will be given later. Each group will give an in-class presentation on May 10 or May 12, 2022. The project paper is due on Tuesday, May 10, 2022 which is the first day of presentations.

4. **Term Exams (20%)**:
   - **Exam One**: Thursday, March 10, 2022
   - **Exam Two**: Thursday, April 21, 2022

Exam One and Exam Two are each one hour and fifteen minutes long (entire class time). All exams are in-class, closed-book, and comprehensive. Make-up exams will be given only at the instructor’s discretion. Note: If you fall behind, you will likely do poorly on the exams as well. Plan on attending office hours if falling behind.

5. **Final Exam (20%)**: A cumulative final will be given in-class scheduled for Wednesday, May 18 from 2:45pm – 5:00pm.
NOTICE: Due to Omicron variant, in-person classes are delayed. Classes will be held online via Zoom from January 26 through February 11. Beginning February 14 in-person classes will resume. Students must come in-person for each class unless university policy extends remote instruction.

Grading Information

Grading calculation will be based on the following:

- Hands-On Exercises (20%)
- Five Homework Assignments (20%)
- Term Project (20%)
- Two Term Exams (20%)
- Final Examination (20%)

Incomplete work: Points will be deducted for incomplete question responses and solutions that are partially functional. Consult individual assignments for details of point allocation for each problem.

Late assignments: No late homework will be accepted. However, under exceptional circumstances, one homework assignment per student might be accepted late. It will need to be handed in prior to the following class meeting and will be graded with 30% off. Such an extension should be requested from the instructor. No late assignments will be accepted at the end of the semester for partial points or to increase grades so do your best to complete all assignments on time.

Makeup Exams: You must submit only your own work on exams. Makeup exams will only be given in cases of illness (documented by a doctor) or in cases of documentable, extreme emergency.

Grading Scale:

<table>
<thead>
<tr>
<th>Point Range</th>
<th>Letter Grade</th>
<th>Point Range</th>
<th>Letter Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>97.0 - 100</td>
<td>A+</td>
<td>72.0 - 76.99</td>
<td>C</td>
</tr>
<tr>
<td>93.0 - 96.99</td>
<td>A</td>
<td>70.0 - 71.99</td>
<td>C-</td>
</tr>
<tr>
<td>90.0 - 92.99</td>
<td>A-</td>
<td>67.0 - 69.99</td>
<td>D+</td>
</tr>
<tr>
<td>87.0 - 89.99</td>
<td>B+</td>
<td>62.0 - 66.99</td>
<td>D</td>
</tr>
<tr>
<td>82.0 - 86.99</td>
<td>B</td>
<td>60.0 - 61.99</td>
<td>D-</td>
</tr>
<tr>
<td>80.0 - 81.99</td>
<td>B-</td>
<td>&lt;60.0</td>
<td>F</td>
</tr>
<tr>
<td>77.0 - 79.99</td>
<td>C+</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

NO extra credit assignments will be given.

Classroom Protocol

- Lecture Mode: This is when class is used as a regular lecture room. Students are expected to listen and follow the lecture. Be considerate to your classmates and follow the lecture. Do not use the computer for outside-of-class activities.
● **Lab Mode:** This is when class is used as a computer lab. Use your laptop computers. Work collaboratively on problems of the Hands-On and share your ideas and solutions with your classmates.

● We alternate between the two modes. A typical class will begin with a lecture (Lecture Mode) followed by a hands-on (Lab Mode).

**University Policies**

Per University Policy S16-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on the Office of Graduate and Undergraduate Programs’ Syllabus Information web page at [http://www.sjsu.edu/gup/syllabusinfo/](http://www.sjsu.edu/gup/syllabusinfo/). Cheating will be taken seriously and can result in a zero for the assignment/exams/course.

Per University Policy S14-7, accommodation shall be provided on any graded class work or activities for students wishing to observe religious holidays when such observances require students to be absent from class. It is the responsibility of the student to inform the instructor, in writing, about such holidays before the add deadline at the start of each semester. If such holidays occur before the add deadline, the student must notify the instructor, in writing, at least three days before the date that he/she will be absent. It is the responsibility of the instructor to make every reasonable effort to honor the student request without penalty, and of the student to make up the work missed.

All students registered for a College of Science (CoS) class with an in-person component must view the **CoS COVID-19 Training** slides and the **SJSU Phased Adapt Plan** website and acknowledge reading them according to their instructor’s directions. By working together to follow these county and SJSU safety practices, we can keep our college safer. Students who do not follow COVID-19 Safety practice(s) outlined in the training, the SJSU Phased Adapt Plan, or instructions from their instructors, TAs or CoS Safety Staff may be dismissed from CoS buildings, facilities, or field sites. Please review this training as needed throughout the semester, as updates will be implemented as changes occur (and posted to the same links).

**Zoom Policies**

**Use of Zoom**

Zoom lectures will be recorded and posted on Canvas for students in the class to access. If you do not wish to appear in a class recording, you have the “anonymous” option (e.g., turning off any identifying information from the Zoom session, including name and picture, prior to recording). You are not allowed to share any class recordings with anyone who is not enrolled in the class or without permission. The recordings are protected by instructor’s copyright. All federal, state, CSU system, and campus regulations on conduct including harassment and discrimination against other students or faculty apply to the online environment, just as in face-to-face instruction.

**Students are not allowed to record without instructor permission**

Students are prohibited from recording class activities (including class lectures, office hours, advising sessions, etc.), distributing class recordings, or posting class recordings. Materials created by the instructor for the course (syllabi, lectures and lecture notes, presentations, etc.) are copyrighted by the instructor. This university policy (S12-7) is in place to protect the privacy of students in the course, as well as to maintain academic integrity through reducing the instances of cheating. Students who record, distribute, or post these materials will be referred to the Student Conduct and Ethical Development office. Unauthorized recording may violate university and state law. It is the responsibility of students that require special accommodations or assistive technology due to a disability to notify the instructor.
Zoom Classroom Etiquette
- Mute Your Microphone: To help keep background noises to a minimum, make sure you mute your microphone when you are not speaking.
- If using a virtual background, it should be appropriate and professional and should NOT suggest or include content that is objectively offensive or demeaning.

Technology Requirements
Students are required to have a laptop. SJSU has a free equipment loan program available for students. If students are unable to have reliable Wi-Fi, they must inform the instructor, as soon as possible or at the latest one week before the test date to determine an alternative.

Technical Difficulties
Internet connection issues:
Immediately email the instructor a current copy of the state of your exam and explain the problem you are facing. Your instructor may not be able to respond immediately or provide technical support. However, the copy of your exam and email will provide a record of the situation. If possible, complete the exam in the remaining allotted time, offline if necessary. Email your exam to your instructor within the allotted time or soon after.

CS 22A: Python Programming for Non-Majors I, Section 02, Spring 2022

Course Schedule
The course schedule is subject to change with fair notice. Changes will be announced on Canvas.
