## Facilities and Administrative Rates Chart

Facilities and administrative (F&A) costs are those that are incurred for sponsored programs operating expenses and costs that cannot be readily associated with a single project, account, or transaction. Reimbursements for those costs are paid by sponsors to the institution (San José State University and the San José State University Research Foundation). F&A rates for educational institutions are reviewed and approved by the U.S. Department of Health and Human Services (DHHS).

### Examples of F&A costs include:

- Depreciation and interest costs associated with the university's physical plant
- Operating and maintenance costs such as utility costs, security costs, and custodial costs
- Common administrative functions such as payroll and purchasing

**The F&A rates listed below are in effect until amended.**
